PROFILE SUMMARY

Product-oriented Software Developer with hands-on experience delivering travel booking, visa management, and digital platform solutions. Skilled in translating business requirements into product features, collaborating with cross-functional teams, and contributing to product planning and feature implementation. Strong technical background combined with growing expertise in Product Ownership, Agile methodologies, backlog management, and stakeholder communication.

PROFESSIONAL EXPERIENCE

Digital Access To Finance (DAF) 06/2026 – Present

Product Owner Maadi, Cairo

- Supported the onboarding of pharmaceutical manufacturers and stakeholders to the national Track & Trace system in alignment with Egyptian Drug Authority (EDA) requirements.
- Analyzed user issues and coordinated with technical teams to resolve system-related requests and improve user experience.
- Participated in factory readiness assessments, reviewing operational workflows and system integration requirements before onboarding.
- Collaborated with cross-functional teams and external stakeholders to ensure smooth adoption and compliance with business processes.

Sainapse Intelligence 10/2024 – 02/2026

Front-End Developer New Cairo, Cairo

- Collaborated with business stakeholders to understand product requirements and translate them into functional solutions.
- Participated in feature planning, estimation, and implementation discussions.
- Worked closely with design and development teams to improve user experience and business outcomes.
- Contributed to defining and refining product requirements during Agile development cycles.

EDUCATION

Helwan University 2020 – 2024

Bachelor's Degree in Business Information Systems (BIS)

Beta Academy 07/2022 – 09/2022

Intensive workshop in Front-End and Back-End web development

PROJECTS

The Travlab

B2B Travel Booking Platform

- Developed a large-scale B2B travel platform integrating external providers such as RateHawk and Hotelbeds.
- Built and maintained a custom design system with reusable components to ensure consistency andscalability across the application.
- Implemented advanced hotel search, filtering, and booking workflows with responsive and accessible userinterfaces.
- Optimized application performance, code maintainability, and user experience using React, Next.js,TypeScript, and modern frontend best practices.

Visalab

Visa Issuance Platform

- Developed a bilingual visa issuance platform (Arabic & English) with a dynamic Visa Wizard that suggestsvisa-eligible countries based on the user's nationality.
- Implemented secure user authentication and a personalized dashboard for tracking visa application status.
- Created a full-featured admin control panel for operations: manage countries, visas, pricing, users, andapplication statuses.

Athar Platform

Full Stack Project (Freelance)

- Built a private streaming platform with NextAuth.js and Middleware for protected content.
- Created a custom CRUD dashboard for seamless management of users and media.
- Built a dynamic system to fetch and sync video metadata directly from YouTube API.
- Integrated Google & Facebook login using NextAuth.js for a seamless, secure user onboarding.

CORE COMPETENCIES
